Green Passion

Green Passion

Green Passion

CASTELGARDEN

Castelgarden was founded in 1962. It is today an European premium brand well known for its ride-on mowers and powered garden equipments. In 2000 Castelgarden became part of Global Garden Products. The GGP Group is Europe's leading garden equipment company, specialising in the development, production and marketing of mainly lawn mowers, lawn riders as well as hand-held powered garden equipments.

In the Castelgarden "*Green Passion 2010*" all the novelties are easily identifiable through the marks placed on the products.

LAWN TRACTORS

Exiting to drive and catchy design, with powerful performance. Castelgarden lawn tractors will win you over with their high quality standards. Designed in Italy, they are the end result of 15 years of experience and are constantly improved by our R&D team with consumer needs clearly kept in mind. Castelgarden models cater for a wide range of needs, ranging from semi-professional tractors including the 4WD driving system to the riders for small-sized garden areas. An extensive range of accessories allows you to use the machines in different situations and enjoy taking care of your garden all year round.

LAWN TRACTORS - XH RANGE

The five tractors with mid-mounted cutting deck are perfect for consumers with large, open garden areas and demanding, professional requirements.

The high-specification XH tractors have a powerful appearance and are equipped with high efficient and modern Briggs & Stratton two cylinder (V-twin) engines, ranging from

22 to 24 Intek, to the professional Honda GXV 660.

Castelgarden XH range features a big 360 litre grass bag with optional electric dump for easier emptying; 102 or 122 cm cutting deck with twin collecting-blades for great cutting performances.

XH RANGE

XHT 220	Intek 22 V-twin
XHX 240	Intek 24 V-twin
XHT 220 4WD	Intek 22 V-twin
XHX 240 4WD E	Intek 24 V-twin

Powered by

XH RANGE

XHX 255 4WD	GXV 660 Twin cyl.
-------------	-------------------

Powered by

1000 m² 8000 m²

The 360 litre large and effective grass bag is perfect for collecting leaves as well as grass. Easily emptied from the driver's seat.

XHX 255 4WD model powered by the new professional Honda GXV 660 engine.

- A - Extra large rear tyres ensure great mobility and a smooth ride; rear 20" – front 16".
- B - Ergonomic and comfortable steering wheel.
- C - The steel chassis – longer, stronger and larger than that used for any other model – provides superior balance and stability.
- D - Useful cup and phone holder and 12 V power supply.
- E - Foot operated hydrostatic transmission and strong iron black foot panel.
- F - Anti-scalp wheels reduce the risk of damaging delicate ground.
- G - The strong bumper protects the front of the tractor effectively.

LAWN TRACTORS - XH RANGE

XH tractors are equipped with 102 cm and 122 cm cutting decks and twin contra-rotating blades. The decks are designed to deliver superior cut quality and uniform collecting and discharge, even in difficult mowing conditions. All models feature the Castलगarden "EASY MEMO" control. A hand wheel located centrally on the cover between the foot panels allows selection of cutting heights from 25 to 100 mm. The chosen cutting height is memorised so that each time you lower the deck the blades will be at the correct cutting height for the job. If the conditions change simply memorise a new height. The headlights on the bonnet are an additional feature designed to provide optimum lighting for mowing and improved visibility for evening use. A range of accessories makes our tractors particularly versatile. They can be fitted with trailers, rollers, stone guards and more. All models include a special mulching kit which allows grass clippings to be recycled when conditions are suitable.

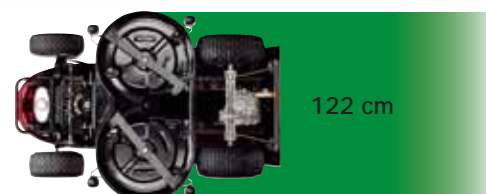

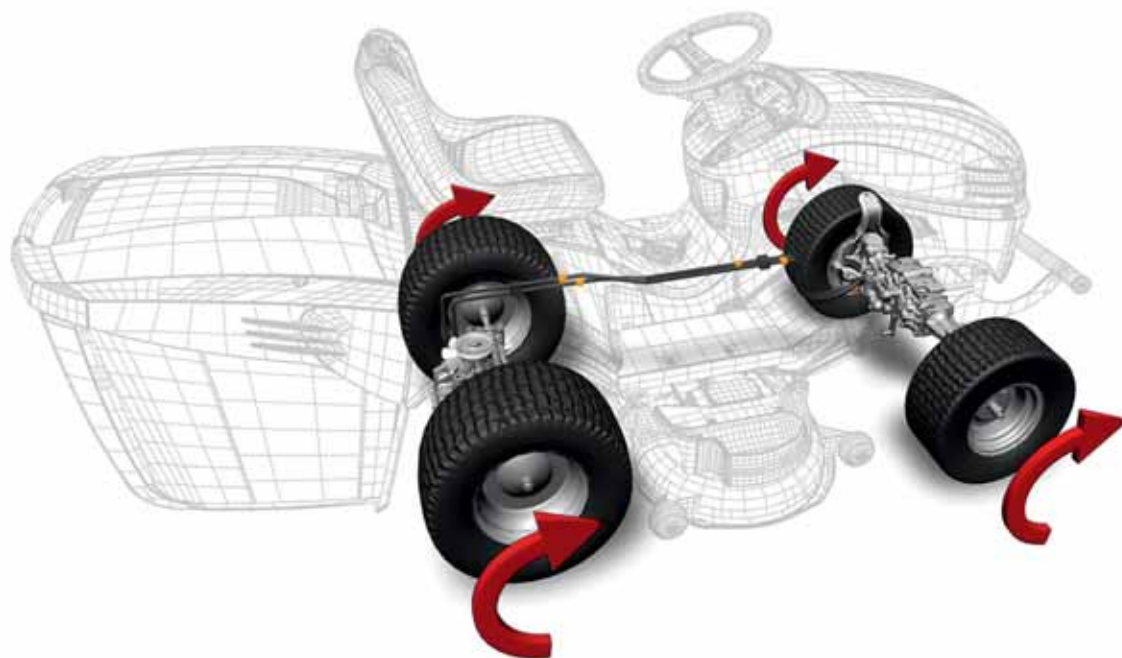

THE 4 WHEEL DRIVE SYSTEM

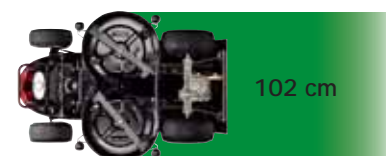

The unique 4 wheel drive system makes Castलगarden XH tractors even more enjoyable and useful. It features a rear pump and a hydraulic drive system on the front axle, for highly efficient hydraulic 4WD transmission. The system ensures traction on uneven, wet and slippery areas and slight slopes. 4WD automatically adjusts the traction on all wheels depending on conditions and terrain.

The benefits of a 4 WD system:

- increased effectiveness using rear mounted accessories;
- the hydraulic system provides excellent traction via differentials, reducing the risk of tearing the grass;
- increased control and manoeuvrability on slopes.

122 cm

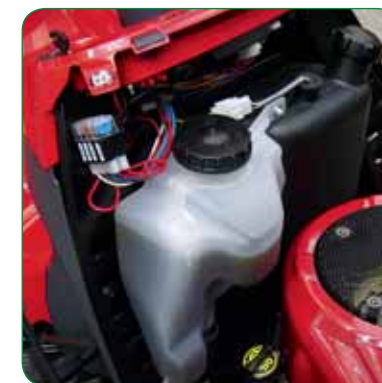

102 cm

Easy to operate twin speed foot pedals for precise control and effortless speed and direction changes. Strong iron foot panels.

The 10 litre capacity fuel tank with level indicator on the dash board. 2.5 litre capacity oil tank (for the 4WD models).

Cutting height is selected with Castलगarden's new "Easy memo" control. It allows selection of a cutting height from 25 to 100 mm with memorisation of the chosen height.

The diagnostic dashboard has 6 colour coded safety LED's and a multifunctional LCD display showing :

- hours of operation
- battery voltage
- RPM
- status of the grass collector
- oil level
- fuel level and reserve gauge
- 24/hour time display

Handy 12 V powers mobile phone, CD player or sprayer. Standard tool tray and cup holder keep tools and beverages within reach.

On the 2 wheel drive models the front axle is made of strong, shock resistant nodular cast iron that does not bend or deform, as can be the case for steel-fabricated axles.

LAWN TRACTORS - XX AND XT RANGE

Castelgarden lawn tractors are equipped with modern multi-function displays which provide the operator with information on safety and tractor functioning. The operator can adjust cutting height, control the RPM of the engine, and easily empty the grass box with the lifting bar or, in some models, electrically from the dashboard. All from the driver's seat bringing comfort and safe operation. 6 LED and a LCD display (where foreseen) are integrated in the dashboard. These models are ideal for medium to big sized gardens. Designed with a strong chassis and high specifications to guarantee maximum reliability. Available with 102 cm (XT) or 122 cm (XX) cutting deck they are the symbol of the Castelgarden lawn-mower tractors.

XX RANGE

XX RANGE		Powered by
XX 255 HD	GXV 660 Twin cyl.	POWERED by HONDA
XX 220 HD	Intek 22 V-twin	BREGGS & STRATTON
XX 220 HDE	Intek 22 V-twin	
1000 m ² 8000 m ²		

XT RANGE

XT RANGE		Powered by
XT 160 C HD	WM 16	CASTELGARDEN
XT 170 HD	P.B. 16,5 AVS	BREGGS & STRATTON
XT 190 HD	Intek 18,5	
XT 200 HD	Intek 22 V-Twin	
XT 175 HD	GCV 530 Twin cyl.	POWERED by HONDA
1000 m ² 8000 m ²		

Deck height from 30 – 90 mm that is easily adjustable from the driver's seat by the 7-position lever.

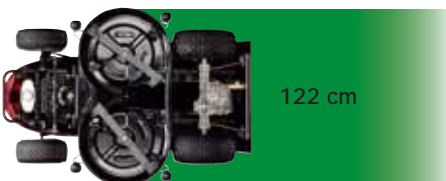

The electronic dashboard is equipped with 6 LED showing:

- Parking brake engaged
- Grass-collector unhooked
- Blades engaged
- Seat without operator
- Neutral gear
- Low battery charge

122 cm cutting deck with contra-rotating twin collecting blades.

- A - Adjustable ergonomic seat.
- B - 15" front wheels.
- C - Strong metal foot panel. Non-slip foot pads help protect the operator's feet from vibration.
- D - Easy access for maintenance.
- E - Big grasscollector, 320 lt volume.

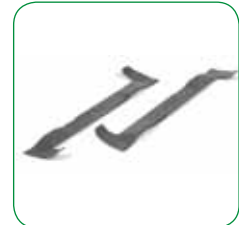

BEST COLLECTING

The Castelgarden XH, XX and XT lawn-tractors are extraordinary in terms of cutting and collecting. Collecting capacity has been greatly enhanced due to the technical developments of our engineers

in the Castelgardem R&D Department. A newly developed straighter tunnel and a larger tunnel mouth have improved the effectiveness of the "inverse vacuum cleaner principle".

Winged collecting blades.

Larger tunnel mouth: the tunnel can be removed without the need for tools.

The grass catcher can be manually emptied with ease from the driver's seat.

The dashboard with multifunction display is standard on the XT model equipped with twin cylinder engine. It provides information about:

- Hours of operation
- Battery voltage
- RPM indicator
- 24 hour clock
- Status of the grass collector
- Oil level
- Fuel level and reserve gauge

102 cm cutting deck with contra-rotating twin collecting blades.

LAWN TRACTORS - XD RANGE

What is the answer when grass is out of control and has to be well cut? Side discharge! The new XD Castelgarden lawn tractor is appealing to look at, compact, extremely handy with its small turning circle and exceptionally comfortable. Cutting performances are excellent due to the 98 or the brand new 108 cm wide cutting deck with improved side-ejection system, increasing effectiveness in demanding conditions. This model also has an electromagnetic clutch for easy blade engagement. Powered by Castelgarden, B&S or Honda engines up to 18,5 and with a capacious 6 litre fuel tank. Available with gear transmission or hydrostatic speed control, the tractor can also be easily converted to a mulching machine thanks to the mulching plug accessory. The trailer hitch that is also included allows use additional accessories such as a small cart.

XD RANGE		Powered by
XD 150 C	WM 14,5	
XD 140	P.B. 13,5 AVS	
XD 170 HD	P.B. 16,5 AVS	
XDL 170	P.B. 16,5 AVS	
XDL 190 HD	P.B. 18,5 AVS	
XDL 175 HD	GCV 530 Twin cyl.	
1000 m²  8000 m²		

Cutting height adjustment in 7 positions from 25 to 80 mm.

Gear selector: 5 forward and 1 reverse.
Central compartment for small objects.

The twin blades guarantee correct grass flow and can be used with the mulching plug for mulching operations.

- A - Adjustable ergonomic seat.
- B - 15" front wheels.
- C - Strong metal foot panel.
- D - Easy access for maintenance.

The central compartment is particularly useful for storing small items.

XD range is now also available with hydrostatic speed control. Safe driving: the tractor stops when the pedal is released.

Wide side ejector mouth for better cutting performance even in demanding conditions.

Reduced turning circle radius due to the great steering control.

Dashboard with RPM control and electromagnetic clutch for easy blade engagement.

Useful holder for bottle and mobile phone.

LAWN TRACTORS - XG RANGE

The XG models are ideal machines for medium sized gardens. This is because they are compact in size, but include high standard features such as the diagnostic display, the rear petrol tank with fuel level indicator, the big front tyres, and the engagement of the blades via electromagnetic clutch. If necessary they can be transformed to mulching machines by adding optional mulching kit.

The XG models include gear and hydrostatic tractors; they are powered with Castelgarden, Briggs & Stratton or Honda engines, with different alternatives to suit different customer needs.

XG RANGE

XG 150 C	WM 14,5
XG 140	P.B. 13,5 AVS
XG 140 HD	P.B. 13,5 AVS
XG 170 HD	P.B. 16,5 AVS
XG 175 HD	GCV 530 Twin cyl.

Powered by

1000 m²  8000 m²

The cutting height can be easily set with 7 different levels.

Contra-rotating 92 cm wide twin blades for a better flow of both air and grass.

- A - Adjustable ergonomic seat.
- B - 260-litre capacity grass collector.
- C - New compartment under the seat.
- D - 15" front wheel.
- E - New 6 LED dashboard.
- F - Front bumper for improved safety.

Forward and reverse hydrostatic speed control. Safe driving: the tractor stops when the pedal is released.

New dashboard with 6 useful diagnostic LED:

- Parking brake engaged
- Grass collector unhooked
- Blades engaged
- Seat without operator
- Neutral gear
- Low battery

New fuel tank placed under the bonnet, 6 lt volume.

New reinforce front axle.

Grass-collector easy to discharge from the operator's seat.

A wide and straight tunnel for better collecting; trailer hitch kit as standard.

LAWN TRACTORS - XF AND XE RANGE

Castelgarden collecting riders are ideal for those who have a small garden but still have a great gardening passion. They are extremely handy and easy to use and are enjoyable and comfortable to drive. Powered by Castelgarden, Briggs & Stratton or Honda engines, the compact riders are available with manual gear or hydrostatic speed control. The grass-collector can easily be emptied sitting on the driver's seat by using the handle bar. The mulching kit is available as optional on all models.

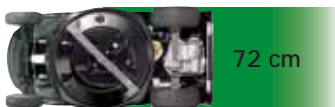

XF RANGE

The compact XF collecting riders have a single blade which increases the effectiveness of the collecting system. They feature a manual gear or hydrostatic speed control. The adjustable seat ensures ergonomic positioning and the grass-collector is easily emptied from the driver's seat via the handle bar.

XF RANGE		Powered by
XF 130 C	Castelgarden WM 12,5	
XF 130	B&S P.B. 13,5 AVS	
XF 140 HD	B&S P.B. 13,5 AVS	
XF 135 HD	Honda GXV 390	
1000 m ²  8000 m ²		

- A - Adjustable ergonomic seat.
- B - Grass-collector capacity: 170 lt.
- C - Adjustment of cutting height – 7 positions.
- D - 72 cm cutting deck; mulching kit available as optional on all models.

72 cm

XE RANGE

These are the smallest Castelgarden riders, but are powerful nevertheless. The engine – with electric start – is placed just between the foot panels with easy access for standard maintenance. They feature a single cutting blade and a 63 cm cutting deck which can be set for 5 different cutting heights ranging from 30 to 75 mm. The innovative continuously variable transmission let you choose the right speed without pushing the clutch.

XE RANGE		Powered by
XE 80 VD	B&S 875 Series E.S.XF	
XE 75 VD	Honda GCV 190 E.S.	
1000 m ²  8000 m ²		

- A - 140 lt. capacity grass collector; easy discharged from the driver's seat.
- B - Cutting height – 5 positions.
- C - 63 cm cutting deck; mulching kit available as optional on all models.
- D - Easy access to the engine for maintenance.
- E - Easy manual blade engagement.

63 cm

The advantage of CVT:
- limitless speed control which gives "hydrostatic drive feeling"
- no clutch required to change speed
- easier to drive between trees and bushes
- reduced fluid maintenance

The grass catcher can easily be emptied from the driver's seat.

Compact single blade cutting deck.

FRONT MOWERS

Castelgarden front mowers are easy to use, versatile and particularly comfortable: all essential features for a great mower. The heavy-duty components along with the powerful engine guarantee many years of reliable and safe service even under difficult conditions. The unmatched traction and manoeuvrability make them ideal for larger gardens. The high comfort level enables the operator to carry out consistently high workloads with minimal stress.

REAP THE BENEFITS OF A FRONT MOWER.

Front mounted cutting deck for improved accessibility.

Because the cutting deck is at the front, nothing is missed. You have full mowing control and can mow along fences, close to trees and under bushes, as well as cut right into corners and over edges. The front mounted cutter decks give a superb finish as the grass is cut before it is run over by the wheels. Great manoeuvrability is assured thanks to the rear wheel steering.

Spring, summer, autumn, or winter, with the wide range of accessories the Castelgarden front mowers become year-round companions.

Castelgarden front mowers are truly for all year-round use. You can cut grass in summer, collect leaves in autumn, clean snow from your garden path in winter and brush away dust and gravel from paved areas in spring. From sweepers and trailers to snow blades – think about accessories you may want to add, either now or in the future.

Mulching technology for a healthy lawn.

A beautiful lawn normally takes three steps: cut and remove the cuttings, water and then add nutrition. With the Castelgarden front mowers you cut and fertilise in one step. With mulching technology the grass is cut and re-cut into tiny bits that are then blown right down into the

turf again. The recycled clippings provide moisture and natural nutrients for your lawn. Cutting is easier and faster because you skip the collection stage. You save time, reduce fuel consumption and minimise environmental impact. That's mulching.

FRONT MOWERS - X1

Imagine real driving pleasure! Castelgarden X1 represents a new generation of compact front mowers for design-conscious home owners. The rear wheel steering and easy-to-use single hand controls reduce time and effort spent in the garden. The idea was to create a vehicle which mows and manoeuvres like the bigger front mowers. Material and construction, comfort and convenience, road grip and performance – the thinking is the same as that behind a modern car. Castelgarden X1 is built on a self-supporting frame in composite material that is cast in a single piece which strengthens the construction. The key word being integrated design.

X 1

Engine: Castelgarden 12.5
Cutting width: 78 cm cutting deck
Gearbox: 3 forward gears; 1 reverse
New adjustable ergonomic seat
Mulching technology

Storage compartment:
like a modern vehicle
the X1 has an integrated
glove compartment.

The cup holder is located
under the steering wheel
for perfect accessibility.

Driving and steering with the
same pair of rear wheels brings
excellent manoeuvrability and
formidable traction.

Manual cutting height
adjustment - 9 cutting heights.

New factory design – the
mounted cutting deck forms an
integrated part of the machine.

One service position. The engine,
the battery and the 3.6 litre fuel
tank are located under the seat.
Clean, neat and service-friendly.

Gearbox, throttle and
engagement of the mower deck
are easy to reach and operate
from the driver's position.

Horizontally adjustable comfort
seat with high back rest for
maximum comfort.

FRONT MOWERS - XM RANGE

The XM Castelgarden front mower range is powered by reliable petrol engines with maximum torque for tough mowing conditions. The engines provide excellent fuel economy, low emission levels, quick starting and quiet operation. The machines are fitted with 3.8 litre fuel tanks to provide sufficient capacity for long mowing sessions. The reinforced protective frame on the deck protects the mower from obstacles that may get in the operator's way. The mulching system turns piles of rotting grass into a thing of the past. Once you try them you will not want to be without them!

XM 160 HD

Engine: Briggs & Stratton 15.5
Hydrostatic drive
Infinitely variably controlled speed
Cutting width: 85 - 105 cm
Adjustable ergonomic seat
Mulching technology and rear discharge
Adjustable steering wheel with spinner

XM 140 HD

Engine: Briggs & Stratton 13.5
Hydrostatic drive
Infinitely variably controlled speed
Cutting width: 85 - 95 cm
Adjustable ergonomic seat
Mulching technology and rear discharge
Adjustable steering wheel with spinner

XM 130

Engine: Castelgarden 12.5
or Briggs & Stratton 12.5
Gearbox: 5 forward gears; 1 reverse
Cutting width: 85 cm
Adjustable ergonomic seat
Mulching technology and rear discharge

Easy access to the manual blade engagement located under the seat on the right side of the machine.

Using the lever on the deck you can easily select the right cutting height from 25-85 mm.

After use, the deck can easily be raised to a 30° washing position for cleaning without removing the belt.

The hydrostatic transmission allows you to control the speed effortlessly, both in forward and in reverse.

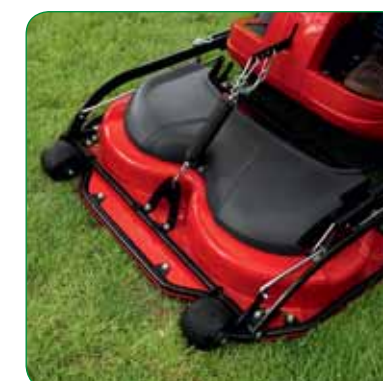

Castelgarden front mowers are compact mowers which require little storage space.

A neat and smooth deck for the Castelgarden front mower. The large deck volume, the aerodynamically designed shape and the two synchronised blades with replaceable blade tips offer a perfect mulching finish.

The steering wheel has an easy-to-grip steering ball for one-handed operation.

All front mowers have bumpers for completely safe operation.

LAWN TRACTORS & FRONT MOWERS

ACCESSORIES

Mulching kits for lawn-tractors

All Castelgarden tractors easily turn into mulching machines to mulch the grass into small pieces that then fertilises the soil.

Stone guard

By using the stone guard to cut long grass without fitting the grass-collector in safe conditions, the grass falls to the ground.

Combi cart

Get to grips with heavy garden tasks with the help of the combi - cart. Rust resistant poly bed and 180 litre capacity, it can be used as a wheelbarrow or hitched on a tractor. Weight with no load: 25 kg. Size: length 159/173, width 83 cm, height 75 cm.

Plastic roller

Tow and push roller, with a very light plastic body (14 kg when not filled). It can be filled with water up to a weight of 114 kg. 45 cm cylinder diameter. Working width: 60 cm.

Trailer hitch kit

Fit a trailer hitch to use rear mounted attachments such as a combi - cart or spreader. Easily fitted onto the tractor rear using the bolts supplied in the kit.

Fertilizer

Fertilizer spreader, with a 40 litre capacity poly bed and an adjustable measuring device from the operator's seat. Spreading width: 240 cm.

Protective cover

Essential to protect your lawn tractor or front mower when not in use. This cover is quick and easy to fit; in just a few seconds your machine is protected from dust and moisture. Designed to fit all tractors, it measures 250 cm long by 125 cm wide and has a side window for ventilation. Easy to fold and put in its bag that measures only 45 x 39 cm!

Snow blade

A robust metal blade, easy to mount on the front of an XX or XT tractor to clean paths and snow from driveways. Working width: 120 cm. It can fit a metal scraper or a rubber scraper bar.

Snow thrower

This accessory transforms tractors into efficient snow removers. Front mounted, with single stage operating, it has a rectangular chute and adjustable skid shoes. The snow thrower can be raised and lowered comfortably from the driver's seat. The chute angle is operated using a control near the steering wheel. Working width: 100 cm.

Rear weight

Easy to fit on the grass-catcher support on the XX and XT models. It improves the stability of the machine when using front accessories, particularly the snow-thrower and sweeper. Weight: 23 Kg.

Sweeper

Ideal for clearing sand, dirt and leaves from asphalt, lawns and concrete areas, this sweeper will also clear newly fallen snow. It features adjustable ground pressure with two rear pivot wheels. The angle is easily adjusted manually. Working width: 110 cm. An optional dust cover is also available.

PTO KIT

The PTO kit enables the lawn tractor to be used to power front mounted accessories like the sweeper or the snow thrower. It is a patented Castelgarden product that transfers the power from the engine to the front accessory. Only fits to XX or XT tractors with electromagnetic clutches.

Front weight

Just a few bolts are all it takes to mount the front weight and the frame weight kit onto your lawn tractor or front mower and improve stability when using rear mounted accessories. Front weight: 11,5 Kg. Frame weight: 13,5 Kg.

LAWN TRACTORS & FRONT MOWERS
ACCESSORIES

Snow chains

Easy to fit on the tractor rear wheels, these classic ladder cross chains in "D-shape" galvanized manganese steel provide traction on snow covered paths.

Pro-snow chains

These snow chains offer increased traction and are recommended when operating on icy ground. Highly efficient with transverse links that are fitted with spikes for maximum traction. Snow chains for 18" tyres.

RAC Quick Connection

RAC stands for "Release And Connect". The system enables you to change accessories in one easy movement, without the need for any tools! Just click on and off. The unique RAC quick connection is available for all XM models.

THE TWO-IN-ONE CUTTING DECK.

The range of high performing cutting decks let you choose between mulching mode and rear discharge. The mulching system recycles grass clippings, with the grass serving as fertiliser for your lawn. The rear discharge mode deposits the grass behind the machine, when the

grass is long. Perfect cutting is achieved by adjusting the cutting height in small gradations. The three decks have manual cutting height adjustment. The roller levels the grass to a perfect finished result.

LAWN MOWERS

Technological innovations and aesthetic improvements characterize the Castलगarden walk-behind lawn mower range. A wide range includes users-friendly electric models as well as high performance petrol engine mowers for heavy duty work. The petrol machines feature engines such as Honda and Briggs & Stratton as well as the latest range of Castलगarden power units, offering both quality and performance. Innovation is much in evidence in the Castलगarden range: in the new 4-in-1 steel galvanized mowers, in the shining stainless-steel mowers and in the upgraded aluminium range, featuring Dryflex wheels, AVS and BBC systems.

XSPW 55 MGS

Big wheel mower

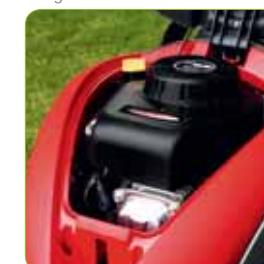

Engine: Castलगarden MC 55
Deck material: steel galvanized
Cutting width: 51 cm; mulching kit included
Grass-box capacity: SILENT bag 70 litres
Wheel regulation: centralized by 1 lever
Cutting height positions: 5-from 30 to 75 mm,
6-from 30 to 90 mm
Driving lever: yes
300 m² 3000 m²

Big rear wheels for more stability, excellent cutting performance and a dynamic look.

The new Castलगarden Silent system reduces noise levels by around 3 db (A) compared to a conventional mower.

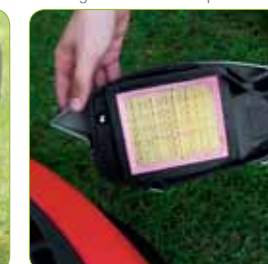

Powerful Castलगarden engine integrated into the bonnet.

Double skin grass box designed to improve airflow and reduce noise and dust emissions.

The oversized air-filter keeps the engine clean and quiet.

Fully adjustable handle with soft grips, ensuring maximum comfort and ergonomics for every user.

Integrated exhaust resulting in reduced noise and emissions in keeping with Euro 2 standards.

Insulated bonnet and optimised engine ventilation.

LAWN MOWERS - PETROL

POWERED by
HONDA™

Powerful Honda OHC engines for the Castलगarden range! The autochoke system ensures easy starting, with the usual excellent standards of reliability, performance and low noise emissions. The improvements such as the stainless steel chassis, the PRO handles and the dryflex wheels, and standard features such as the fully adjustable ergo handles and the mulching plugs, combine to make these walk behinds unique in the lawn-care market. Regardless of the choice of chassis material (aluminium, ABS or galvanised steel), and the cutting system (collecting or mulching), Castलगarden lawn mowers powered by Honda are the ideal solution for demanding gardeners.

XSI 55 MHS INOX XSIW 55 MHS 4 INOX

Big wheel mowers

300 m²  3000 m²

NEW Honda engines with autochoke system. Easy starting in all conditions.

Big wheels for perfect cutting results even in the most demanding garden conditions. Wheel dimensions: front 210 mm – back 300 mm.

Stainless steel deck.

Stainless steel is an iron-carbon alloy with a minimum of 10.5% chromium content. The name comes from the fact that stainless steel does not stain, corrode or rust as easily as ordinary steel. Stainless steel has higher resistance to oxidation and corrosion in natural and man-made environments. It is a hard wearing material that brings extra durability to the machine.

POWERED by **BRIGGS & STRATTON**

Powerful, versatile and always reliable, Castलगarden lawn mowers powered by Briggs & Stratton engines handle big and medium size lawns with ease. The Ready Start system in the engines is a useful feature which makes mowing more comfortable than ever. Different engine powers combine with different sizes and deck types. The mowers can also accommodate textile grass-catchers and mulching plugs. They are user-friendly with ergonomic controls and light weight for full manoeuvrability.

POWERED by
CASTELGARDEN

Improvements never stop in Castलगarden. A wide range of Castलगarden OHV (Over Head Valve) engines powers these specific models. Designed to fit Castलगarden applications, the engines feature 140 cc, 160 cc and 196 cc displacements, cast-iron cylinder sleeves and a decompression system which ensures durability and ease of use. No compromise is made in order to guarantee performance, quality and reliability. Particular attention is paid to emissions and noise level reduction.

LAWN MOWERS - ELECTRIC

Castelgarden electric lawn mowers tackle smaller lawns between 200 and 800 m². They weigh less than petrol mowers, are inexpensive to operate, easy to maintain and quiet to use. Just plug them in, push a button and you're off! No starter to pull, no need to check the petrol tank or the oil dipstick. The easy-start electric motor powers the blades with a cutting width from 33 cm to 46 cm. Controls are handily located on the handlebar. The handlebar folds in for easy storage in restricted spaces.

Centralized wheel adjustment on the deck, for accurate and fast setting of the grass height from 21 to 60 mm.

Ergonomic handle with dual hand safety switch and foldable telescopic bars for easy height adjustment.

Powerful 1600 Watt electric motor for an excellent cutting result.

LAWN MOWERS - SPECIAL EDITION

POWERED by

HONDA

Castelgarden presents the Special Edition range with models to cater for the specialised demands of small to big garden owners. The assortment includes petrol driven models – with Castelgarden, Briggs & Stratton or Honda engines – as well as electrical machines. Important feature is the 4-in-1 cutting system, as well as the adjustable and foldable handlebar, on steel deck models. The cutting width ranges from 33 cm to 51 cm for the largest models.

A CLEAN LOOK FOR THE NEW FOUR IN ONE

Important changes for the Castलगarden professional models! The new steel deck XSPW series meets the needs of demanding users and re-establishes Castलगarden's leadership position in garden care technology. Italian design and strength are the two distinguishing features. Special attention has been paid by the Castलगarden engineers to construction and function. Innovative solutions improve airflow under the deck to bring excellent cutting results and maximize collection in the oversized grass catcher. And this is not all. The four in one system

makes changing from cutting to side discharge or from collecting to mulching easy with a simple flick of the switch. Even cutting heights have been re-defined to adapt to every lawn type. A wide choice of technical features sets new standards: 4-speed variator combined with Anti-Vibration system, BBC (Blade Brake Clutch), centralized cutting adjustment and the integrated washing link that brings versatility and comfort. The XSPW series is available with Briggs & Stratton or Honda engines and also in the stainless-steel version.

LAWN MOWERS - PROFESSIONAL

With the Professional range, Castelgarden breaks new ground. The BBC (Blade Brake Clutch) allows the engine to be turned on while blade is stopped and the user can engage and disengage the blade directly from the handle as needed. A clever feature for comfortable and faster mowing. The Pro 60 models are especially designed for heavy duty mowing. Engineered with long lasting components, ergonomics and features for maximum performance, Pro 60 models are available with B&S or Honda engines, with integrated AVS on the handle, and professional transmission for excellent cutting results in all grass conditions.

BRUSHCUTTERS

Castelgarden trimmers and brushcutters are ideal not only for professional but also for private users. Depending on their power rating and type, they can be used to remove tough scrub and thin out overgrown bushes, as well as for general mowing works. With their interchangeable cutting heads, that feature everything from nylon lines to metal blades, they have a versatility that is rarely seen on the market. They're not only easy to operate, but also easy to start - in all weather conditions. The powerful engines are robust and hard-wearing. The new body design for some models, the grip on the handle bar and the anti-vibration system are the biggest changes. The back pack of the flex models is also completely updated, which brings an outstanding level of comfort.

C

D

A

B

- A - Air filter.
- B - Controls on the handgrip.
- C - Handle with safety barrier.
- D - Handgrip connection vibration proofed.

The two stroke engine and the handgrip are vibration proofed. The controls are integrated to ensure perfect control and higher work quality. All models feature a shoulder harness, which makes handling easier

and reduces fatigue, two nylon trimmer lines and three or four tooth discs for grass cutting. Ergonomic bike handlebars or standard handlebars with safety barrier ensure comfortable and safe use.

New double comfort harness.

- Carburettor: diaphragm with 2 port rotary and primer bulb
- Standard cutter: Tap&Go - 4T blade
- Weight: 8.40 kg*

Single harness.

* Weight includes nylon head.

BRUSHCUTTERS - PETROL

Castelgarden brushcutters can be divided into three categories:

- S** Easy to use, they are ideal for small cutting areas. Due to their materials they are extremely lightweight.
- M** They are ideal for small farmer works. The engine and the anti-vibration system allow longer work sessions without stress.
- L** Professional models with particularly powerful engines.

New double comfort harness.

Tap & Go nylon head Profi.

XB 43 DS

- L** Displacement: 42.7 cc
Power: 1.4 kW - 1.9 HP
Shaft: 28 mm
Handle: bike
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go - 4T blade
Weight: 9.00 kg*

XB 35 DS

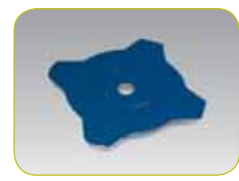

- M** Displacement: 32.6 cc
Power: 1.1 kW - 1.5 HP
Shaft: 26 mm
Handle: bike
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go - 4T blade
Weight: 7.90 kg*

Double harness.

BRUSHCUTTERS - PETROL

The products have perfect balance and an excellent power-weight ratio. A rigid drive shaft and the ergonomic handlebar with incorporated controls and comfortable grip ensure top performance. "Easy Starter" provides easy start-ups every time.

Double harness.

3 tooth blade.

Tap & Go nylon head.

Single harness.

XB 29 DS

S Displacement: 25.6 cc
Power: 0.9 kW - 1.2 HP
Shaft: 24 mm
Handle: bike
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go - 3T blade
Weight: 6.00 kg*

XB 29 S

S Displacement: 25.6 cc
Power: 0.9 kW - 1.2 HP
Shaft: 24 mm
Handle: loop
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go - 3T blade
Weight: 5.60 kg*

XR 29 S

S Displacement: 25.6 cc
Power: 0.9 kW - 1.2 HP
Shaft: 26 mm curved
Handle: loop
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go
Weight: 5.30 kg*

THE BACK PACK MODELS

Ideal for mowing steep banks, overgrown slopes, narrow ditches vineyards or orchards. The weight is carried on the user's back for maximum comfort. The back pack - completely new in design and material - allows ergonomic distribution of weight and thanks to the cushioning reduction of vibration during operating.

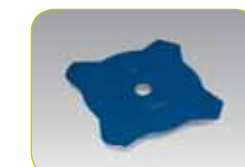

Flame-proof and equipped with quick uncoupling fastener for great safety, it only weights 0,9 kg. The flexible connection between engine and shaft allows use without tiring even when working uphill. The "Easy Starter" system ensures smooth and simple starting.

XB 51 FS

XL Displacement: 47.1 cc
Power: 2.0 kW - 2.7 HP
Shaft: 28 mm flexible
Handle: loop
Carburettor: diaphragm with 2 port rotary and primer bulb
Standard cutter: Tap&Go - 4T blade
Weight: 12.00 kg*

Tap & Go nylon head Profi.

ACCESSORIES

For pruning at great heights. Developed for Castelgarden brushcutters, the accessories make it easier and safer to prune fruit trees and thin out shrubs and bushes. Branches can be cut keeping

your feet on the ground and using the pruner or the hedge cutter. As they have low power absorption we recommend use with models with engines from 28 to 35 cc.

BRUSHCUTTERS - ELECTRIC

The powerful and robust Castelgarden electric grass trimmers are ideal for mowing smaller lawns and undergrowth and for precise finishing touches under bushes, on path borders, around wall corners and at the edges of steps and fences. They are quiet and easy to start - you simply push a button. The engine is at the top, making them very easy to handle. The shaft connects to the engine and controls the trimmer head, where the plastic lines revolve. The low-noise cutting threads are automatically reset by tapping the trimmer head on the ground. Take into account your landscape when choosing a trimmer. Trimmers with a straight shaft can reach beneath bushes and shrubs more easily whereas curved shafts are easy to handle.

Jointable shaft for easy transportation.

Strap for comfortable use included.

Tap&Go nylon head used on all models.

XB 10 JEL

Power: 1000 Watt - 1.0 kW
Shaft: 25 mm jointable
Handle: loop
Standard cutter: Tap&Go - 4T blade
Weight: 6.00 kg

4T blade for the model XB 10 JEL.

TRIMMERS - ELECTRIC

Put the finishing touches on your lawn using one of Castelgarden's electric trimmers. Ideal for trimming light grass around the garden and for improving the look of your property quickly and with ease. Castelgarden trimmers are lightweight and quiet, start with the push of a button, produce no exhaust emissions and require little maintenance. Perfect for those with smaller gardens or light weeds!

Strap is included for the XB 10 JEL and XR 11 EL models.

XR 11 EL

Power: 1100 Watt - 1.1 kW
Shaft: 26 mm
Handle: loop
Standard cutter: Tap&Go
Weight: 5.06 kg

XR 9 JEL

Power: 850 Watt - 0.85 kW
Shaft: 25 mm jointable
Handle: loop
Standard cutter: Tap&Go
Weight: 5.53 kg

XR 7 EL

Power: 700 Watt - 0.7 kW
Shaft: 25 mm
Handle: loop
Standard cutter: Tap&Go
Weight: 5.02 kg

XR 500

Plastic housing with aluminium shaft
Power: 500 Watt - 0.5 kW
Shaft: 21 mm
Handle: loop adjustable
Standard cutter: Tap&Go
Weight: 2.66 kg

The comfortable handle brings better manoeuvrability and is easily adjusted via the screw.

The operational angle of the head can be slightly adapted in order to reach difficult nooks.

XR 350 J

Rigid plastic housing
Power: 300 Watt - 0.3 kW
Shaft: Jointable
Handle: loop
Standard cutter: Tap&Go
Weight: 1.72 kg

HEDGE CUTTERS

Regular hedge trimming is an essential part of park, garden and landscape maintenance to ensure dense, healthy growth and tidy hedges. Castelgarden hedge trimmers are distinguished by their hard-wearing construction and practical features. Choose between Castelgarden petrol or electric hedge cutters depending on the intended use.

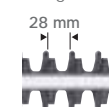

HEDGE CUTTERS - PETROL

Castelgarden petrol hedge trimmers have been developed to combine ergonomic design with high quality and excellent cutting performance.

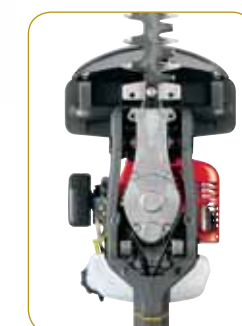

The handle rotates through 90° from left to right, ensuring the best cutting position at all times.

XHM 75

Displacement: 25.4 cc
Power: 0.8 Kw – 1.1 HP
Blade: **Single**
Blade length: 75 cm
Teeth dist.: 28 mm
Mech. Brake: yes
Anti-vibr.: no
Adj. Handle: no
Weight: 5.40 Kg

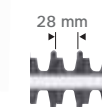

The engine and starter have been designed so the machine starts quickly with minimum effort.

XHM 60

Displacement: 25.4 cc
Power: 0.8 Kw – 1.1 HP
Blade: **Laser double**
Blade length: 60 cm
Teeth dist.: 28 mm
Mech. Brake: yes
Anti-vibr.: yes
Adj. Handle: yes (180°)
Weight: 5.70 Kg

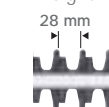

Anti-vibration system: precisely calculated spring elements dampen down engine vibrations to a minimum, reducing fatigue.

Adjustable rear handle: the rear handle is adjustable for easier cutting of hedge sides and tops.

XHJ 550

Displacement: 24.5 cc
Power: 0.9 Kw – 1.2 HP
Blade: **Laser double**
Blade length: 61 cm
Teeth dist.: 28 mm
Mech. Brake: yes
Anti-vibr.: yes
Adj. Handle: yes (180°)
Weight: 5.40 Kg

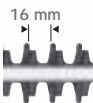

HEDGE CUTTERS - ELECTRIC

Castelgarden electric hedge cutters are powerful enough for most trimming jobs, even when branches are old and tough. They are comfortable to use, lightweight, quiet and environmentally friendly. They guarantee perfect cutting of hedges and shrubs, making them ideal for small to medium sized gardens. They are equipped with double-sided blades for rapid cutting both upwards and downwards. The quick-stop blade brake and the large hand guard guarantee increased safety and the adjustable handle allows ergonomic operation in any position.

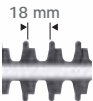

XH 470 E

Power: 450 Watt - 0.45 kW
Blade length: 450 mm
Teeth distance: 16 mm
Weight: 3.35 kg

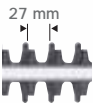

XH 540 E

Power: 500 Watt - 0.50 kW
Blade length: 550 mm
Teeth distance: 18 mm
Weight: 3.45 kg

XH 600 E PRO

Power: 600 Watt - 0.60 kW
Blade length: 600 mm
Teeth distance: 27 mm
Weight: 3.80 kg

XGS 60 LI

Battery type: lithium - ions
Battery power: 3.6 v
Grass blade width: 8 cm
Shrub blade length: 16 cm
Charging time: 5 hours
Operating time: 50 min.
Weight: 540 g

Shrub shear blade.

Metal gear.

Grass shear blade.

Power set.

Easily removable tooling system.

Powerful cutting teeth.

Soft touch handle bar.

CHAINSAWS

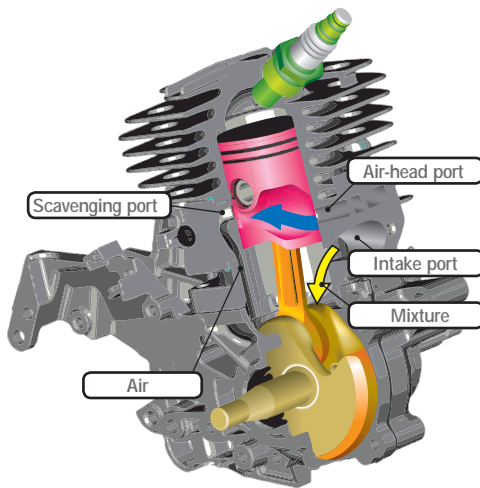

Castelgarden chainsaws are the handy solution whether you are a homeowner cleaning up a few trees and branches in the yard or a farmer cutting firewood and keeping the pasture clear. They are reliable and powerful machines delivering professional quality and performance for the toughest jobs.

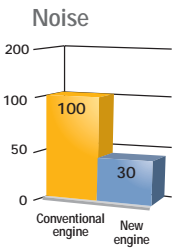

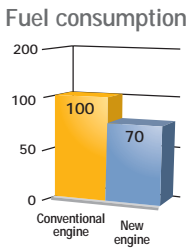

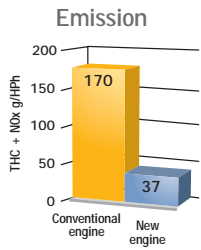

STRATO CLEAN TECHNOLOGY

A selection of the Castelgarden petrol chainsaws features the new Strato Clean Technology. In a two stroke conventional engine, part of the fresh fuel mix is expelled with the exhaust gases during the combustion phase; this component of unburned fuel mix is the main cause of high emissions. The Strato Clean Technology is a layer of pure air interposed between the flow of fuel mix

made up of air plus fuel and exhaust gases. Because of this layer of pure air, emissions are 70% lower than those for a conventional 2 stroke engine. In addition, this layer of air ensures the complete combustion of the fuel mix without any loss of fresh fuel mix (air + fuel). This brings considerable fuel savings of up to 30% compared to a conventional engine.

Advantages:

XC 40 P
XC 42 P
XC 44 P

Displacement: 40.1 cc
Power: 1.8 kW - 2.4 HP
Antivibration: yes
Bar length 40 P: 13" - 33 cm
Bar length 42 P: 16" - 40 cm
Bar length 44 P: 18" - 45 cm
Chain type 40 P: 325".050" (95VP - 56E)
Chain type 42 P: 325".050" (95VP - 66E)
Chain type 44 P: 325".050" (95VP - 72E)
Oil pump: automatic / adjustable
Weight: 4.36 kg*

- A - Excellent anti-vibration system.
- B - Bar with sprocket nose.
- C - Side chain tensioner (only for XC 42 P / XC 44 P models).
- D - Adjustable oil pump.
- E - Fast idle carburettor. Air lever automatic return.
- F - Automatic chain break system.
- G - Easy access to air filter and spark plug w/o tool.
- H - Handle isolated from engine.
- I - Primer (only for XC 44 P model).

*Weight without bar and chain.

CHAINSAWS - PETROL

The Castelgarden petrol chainsaw range includes pruning models as well as semi – professional chainsaws. They are all easy to handle, high quality and high performing. They have an “Easy Starter” system which guarantees starting in all weather conditions. Strato Clean Technology features on some models, with these machines one step ahead of European emission legislation. Castelgarden chainsaws are available in three categories:

- L** Compact chainsaws for small pruning or wood chopping work. These are the perfect bridge between hobby and agricultural requirements.
- XL** Farmer chainsaws, ideal for agricultural use but also for use in extreme environments.
- XXL** Semi-professional chainsaws for tree cutting as well as for demanding environments.

XC 68

Displacement: 62.0 cc
Power: 3.0 kW - 4.1 HP
Bar length: 18" - 45 cm / 20" - 50 cm
Chain type: 3/8".058" (73LP - 66 / 72 E)
Oil pump: automatic adjustable
Weight: 5.67 kg*

XC 48 P

Displacement: 48.7 cc
Power: 2.1 kW - 2.9 HP
Bar length: 18" - 45 cm
Chain type: 3/8".050" (95VP - 72E)
Oil pump: automatic adjustable
Weight: 5.30 kg*

- A** - Two-mass anti-vibration system.
- B** - Automatic chain lubrication.
- C** - Woven wire new air filter.

XC 47 P

Displacement: 48.7 cc
Power: 2.1 kW - 2.9 HP
Bar length: 16" - 40 cm / 18" - 45 cm
Chain type: 3/8".050" (95 VP - 66 / 72 E)
Oil pump: automatic
Weight: 5.30 kg*

Replaceable cartridge filter does not require tools.

Air lever with automatic return: a convenient starting device.

Automatic starter.

Decompression valve.

Metal spikes.

XC 52 P

Displacement: 50.9 cc
Power: 2.3 kW - 3.1 HP
Bar length: 18" - 45 cm / 20" - 50 cm
Chain type: 3/8".058" (21BP - 72 / 78 E)
Oil pump: automatic
Weight: 5.52 kg*

*Weight without bar and chain.

CHAINSAWS - PETROL

XC 38 P is the smallest chainsaw and it is designed for leisure and part-time use. Our main focus, as always, is on the user and the work environment. For this machine our requirements in terms of safety, function, ergonomics and reliability are as high as those for professional tools. Simply the best power to weight ratio, high torque and throttle response, featuring low emission, low noise and fuel economy.

- A - Bar with sprocket nose.
- B - Automatic and inertial chain brake.
- C - Primer.
- D - Fast idle carburettor.
- E - Limited vibration with the handle isolated from the engine with steel springs.

Low emissions and low noise.

Primer and easily removable air filter without tools.

XC 38 P

Displacement: 38.3 cc
Power: 1.7 Kw – 2.3 HP

CHAINSaws - PETROL

The concept of Castelgarden chainsaws was born to guarantee some peculiar features including handiness, reliability, easy starting and lightness that make their use friendly and pleasant, and assure high quality and excellent performance. The engine marked by low emissions of exhaust fumes is one of the reasons why the Castelgarden chainsaws are Euro 2 approved.

XC 400 Q

Displacement: 40.0 cc
Power: 1.6 kW - 2.2 HP
Bar length: 16" - 40 cm
Chain type: 3/8".050" (91PJ - 56E)
Oil pump: automatic
Tensioner: tool free
Weight: 4.40 kg*

XC 400

Displacement: 40.0 cc

Weight: 4.35 kg*

XC 350

Displacement: 35.0 cc
Power: 1.4 kW - 1.9 HP
Bar length: 14" - 35 cm / 16" - 40 cm
Chain type: 3/8".050" (91PJ - 52 / 56E)
Oil pump: automatic
Tensioner: front
Weight: 4.35 kg*

CHAINSaws - PRUNING

The Castelgarden pruning models have been designed for professional use. Compact, well-balanced and light, they guarantee perfect and fast cutting even for lengthy and intensive work. The XC 27PC model is designed for tree pruning by professionals. The carving bar with 1/4"

chain allows precise and sharp cutting, perfect for grafting and plant maintenance. Personal protective equipment such as helmets, gloves, visors, safety footwear and protective overalls must always be worn when using any of these machines.

XC 28 P

Displacement: 25.4 cc
Power: 1.0 kW - 1.3 HP
Antivibration: yes
Bar length 28 P: 12" - 30 cm sprocket nose
Chain type 28 P: 3/8".050" (91VG - 45E)
Oil pump: automatic adjustable
Weight: 2.98 kg*

Balanced ergonomic handle.

XC 27 P

Displacement: 25.4 cc
Power: 1.0 kW - 1.3 HP
Antivibration: yes
Bar length 27 P: 10" - 25 cm sprocket nose
Chain type 27 P: 3/8".050" (91VG - 40E)
Oil pump: automatic adjustable
Weight: 2.98 kg*

Professional air filter.

XC 27 PC

Displacement: 25.4 cc
Power: 1.0 kW - 1.3 HP
Antivibration: yes
Bar length: 10" - 25 cm carving
Chain type: 1/4".050" (25AP - 60E)
Oil pump: automatic adjustable
Weight: 2.98 kg*

*Weight without bar and chain.

CHAINSAWS - ELECTRIC

Castelgarden electric chainsaws are ideal for people who occasionally use saws for light work around the house. They can take care of the trimming of bushes and small branches, as well as of the cutting down saplings. They are fun, light, easy to use and quieter than petrol saws. The convenience begins even before you start cutting, you just plug it in and off and you go. They do not require any specific maintenance. To store simply place the guard on the bar and wind the cord up. From 1700 to 2000 Watt, with manual or quick version tensioner.

XC 19 PE
XC 22 PE
XC 22 QE

Power 19 PE: 1800 Watt
Power 22 PE / 22 QE: 2000 Watt
Bar length 19 PE: 14" - 35 cm
Bar length 22 QE / 22 PE: 16" - 40 cm
Chain type 19 PE: 3/8" mini .050" (91VG - 50E)
Chain type 22 QE / 22 PE: 3/8" mini .050" (91VG - 56E)
Chain tensioning 19 PE / 22 PE: manual
Chain tensioning 22 QE: quick chain tightening
Oil pump: automatic
Weight: 3.90 kg*

The screw allows the manual tensioning of the chain (model XC 19 PE and XC 22 PE).

EX 200

Weight: 4.05 kg*

*Weight without bar and chain.

BLOWERS

Castelgarden power blowers are available in both hand-held and backpack options. Low noise levels and high volume air output combine to create performance blowers that are also comfortable to operate. The hand held versions have a large handgrip for use with gloves and can easily be converted into a vacuum cleaner. The backpack model has wide angle tube rotation, an extra flexible tube, a variable speed throttle mounted on the tube with cruise control and shock absorbers to reduce vibration. The see-through tank on all three models enables quick checking on fuel supply. Blow away your biggest jobs in less time with this powerful Castelgarden blower.

XBL 620 B

Displacement: 62.0 cc
Power: 2.9 kW - 3.9 HP
Average air vol.: 15.7 m³/min.
Max air speed: 87 m/sec
Carburettor: diaphragm rotary valve
Weight: 8.50 kg

XBL 260 H

Displacement: 25.4 cc
Power: 0.7 Kw – 1.0 HP
Air volume: 7.8 cu.m/min.
Air speed: 28 m/s
Weight: 5.0 Kg

NEW

Vacuum kit included

XBL 250 H

Displacement: 22.5 cc
Power: 0.9 kW - 1.2 HP
Average air vol.: 10 m³/min.
Max air speed: 67 m/sec
Carburettor: diaphragm
Weight: 4.04 kg

CHIPPER & SHREDDER

Leaves and other vegetation account for a large portion of landfill waste. The chipper and shredder cut brush and small branches to a size that is easier to handle and suitable for composting or mulching, reducing moisture loss and weed regrowth and improving the appearance of your garden. Shredding leaves and grass clippings also reduces the time it takes to compost materials to decay. The Castelgarden chipper and shredder are light-use, electrically powered models. They differ in terms of technology and end result, but are both extremely useful machines.

BIO POWER

Knife chipper: knives are double reversible
Powerful motor: 2100 Watt – 2.1 kW
Capacity for branches: up to 40 mm (inlet opening)
Cutting system: rotating disc with 2 blades
Weight: 19.0 kg
Self-feeding function
Zero current switch
Collector included

The blade system is based on a rotating disc that has two blades mounted on the top. The blades cut branches into small chips.

BIO QUIET

Cuts and crushes the waste
Powerful motor: 2100 Watt – 2.1 kW
Capacity for branches: up to 45 mm (inlet opening)
Cutting system: silent cutter
Weight: 23.0 kg
Reverse function
Self-feeding function
Zero current switch
Collector included

Matter is cut and crushed with a slowly rotating roller with sharp teeth. The mechanism pulls the branches down, and chips them into rough compost.

Comfortable and very easy to use and transport.

The blades cut and crush the wood into pieces.

Large bag to collect and transport chippings.

Sharp blades for extremely small wood cutting.

SCARIFIER

Scarifying is important to maintain the quality of your lawn. Castelgarden electric models are easy to use and efficient at removing moss and thatch. Their vertical cutting blades cut deep grooves into the soil, allowing regenerative oxygen to penetrate into grass roots. The scarifier cuts the roots into smaller pieces that then generate new shoots, helping to make your lawn compact and vigorous.

XSE 32

Power: 1500 Watt - 1.5 kW, low noise
Working width: 32 cm - 12 knives - Ø 155 mm
Working depth: 5 positions
from -10 mm to + 3 mm and transport position
Single lever for convenient changes of working depth
Collector: 40 litres included
Weight: 20.0 kg

XRE 30

Power: 1100 Watt - 1.1 kW
Working width: 30 cm
Working depth: 3 positions
Collector: 35 litres included
Weight: 17.0 kg

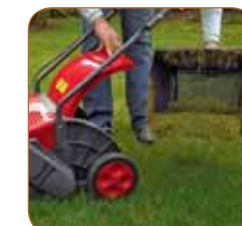

The blades cut deep grooves into the soil allowing oxygen to penetrate into the grass roots.

It cuts the roots into small pieces that generate new shoots.

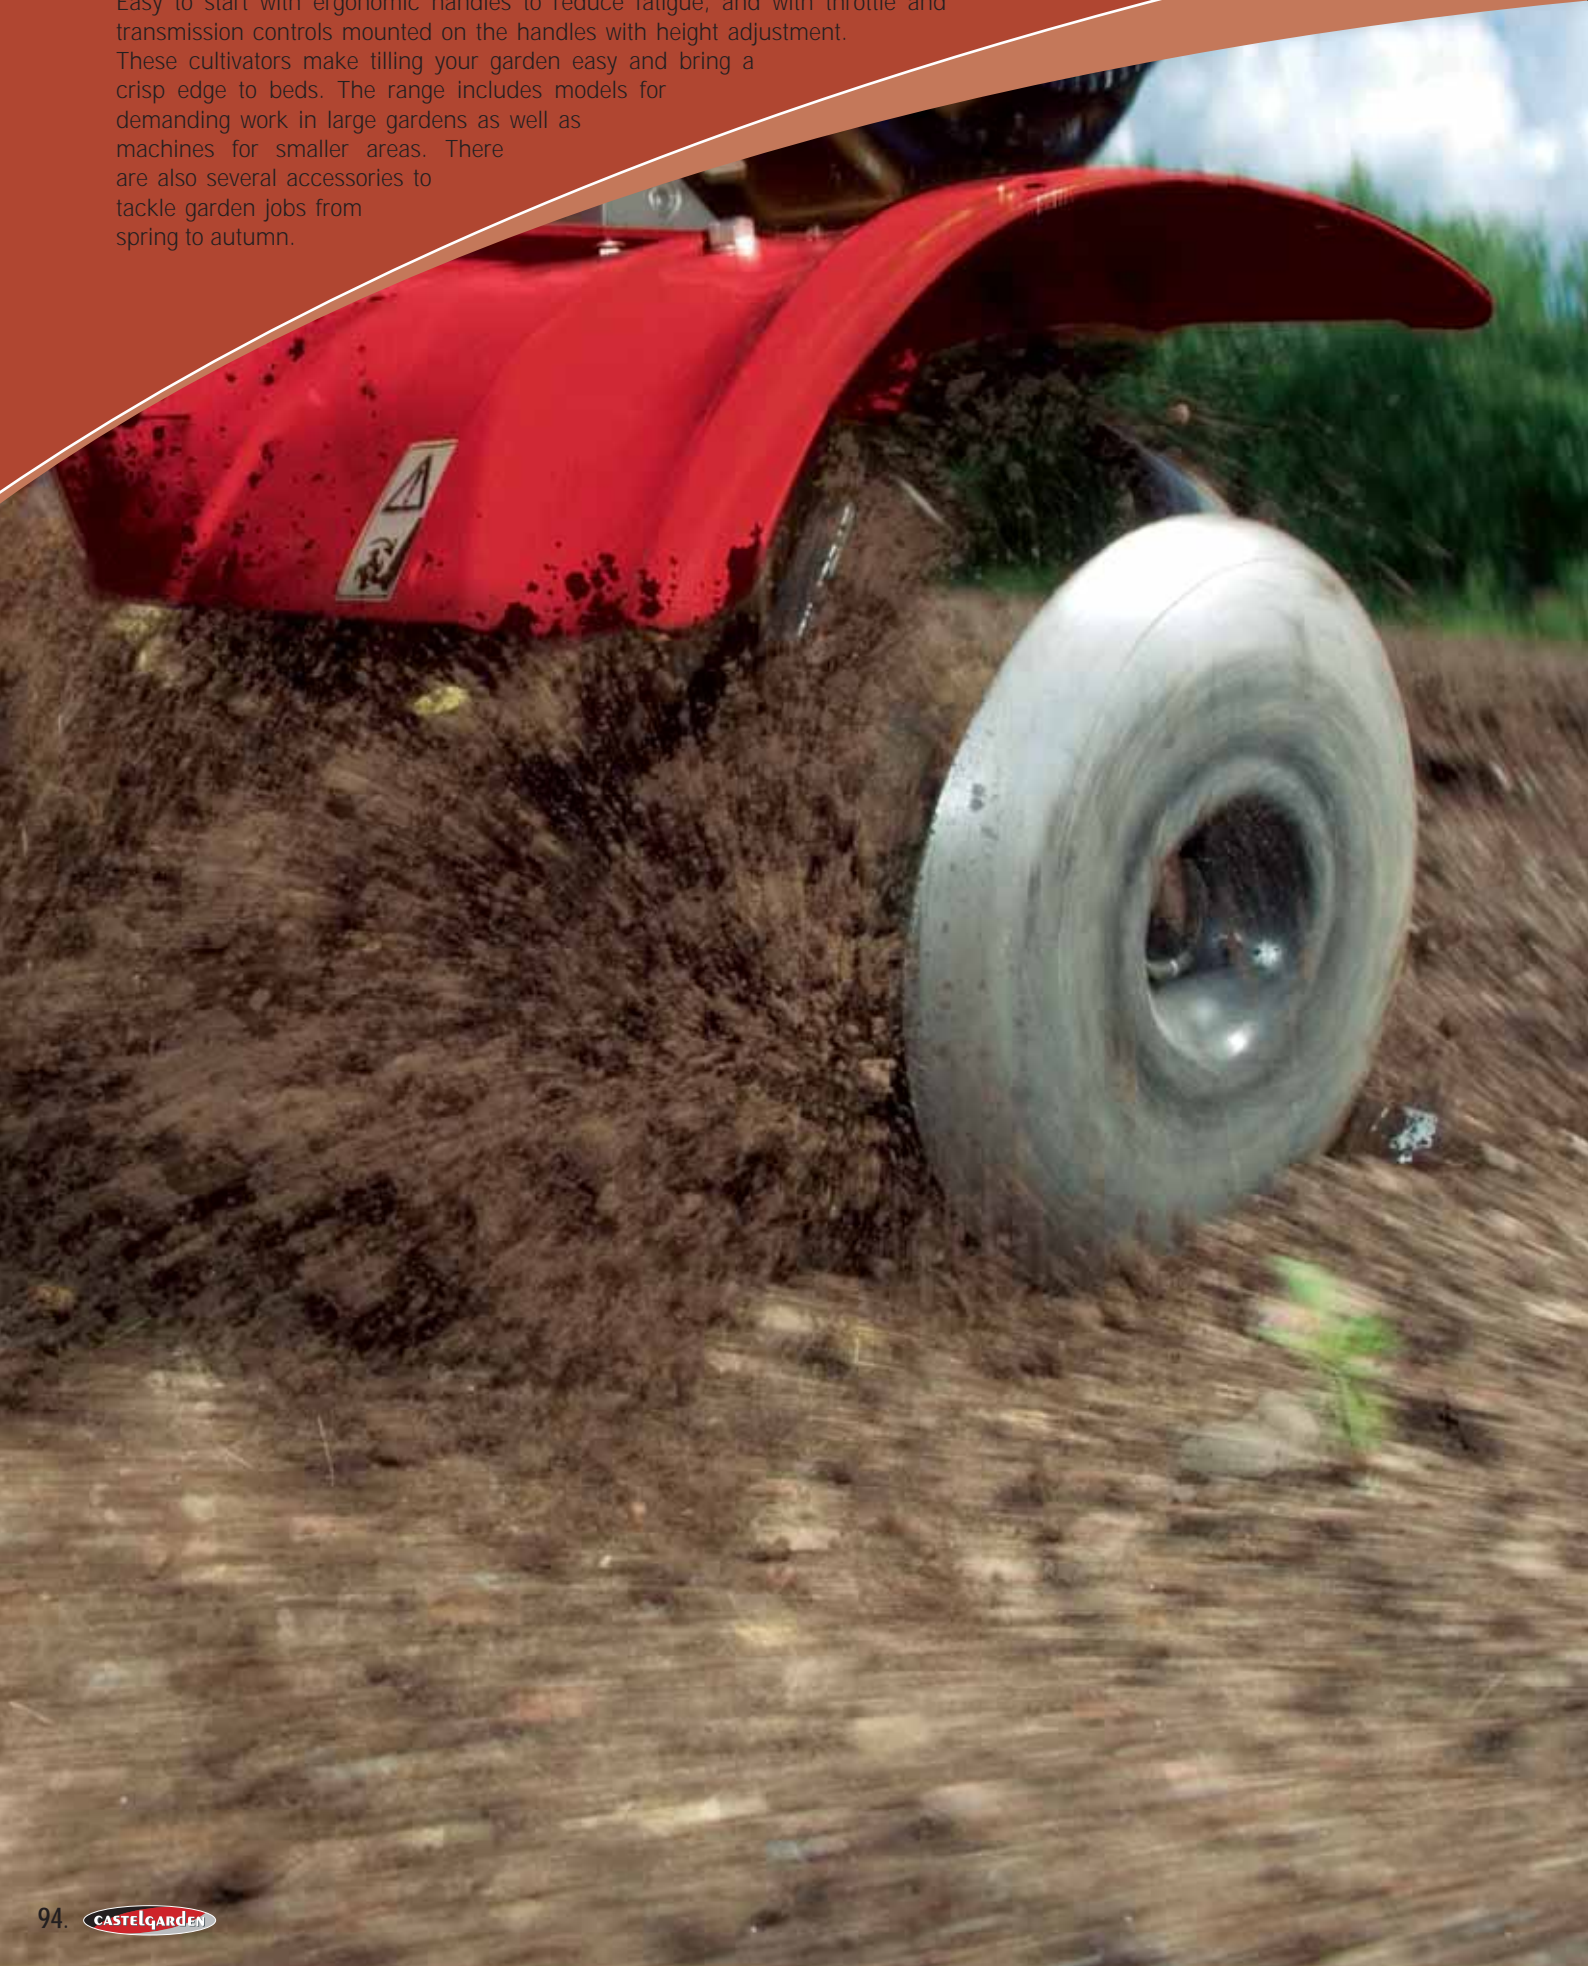

The grass box collects the thatch from the lawn as you go.

New rake.

CULTIVATORS

Castelgarden presents its own cultivator range. Their light weight ensures easy manoeuvring. Easy to start with ergonomic handles to reduce fatigue, and with throttle and transmission controls mounted on the handles with height adjustment. These cultivators make tilling your garden easy and bring a crisp edge to beds. The range includes models for demanding work in large gardens as well as machines for smaller areas. There are also several accessories to tackle garden jobs from spring to autumn.

Specific for cultivating. Powerful engine, a 60 cm rotavator and 2 working gears. Tellus 103 B controls are simple and ergonomic, easy to use for the hobby users as well.

TELLUS 103 B

Engine type: B&S INTEK OHV 6.5
Transmission: Gears and chain in oil bath and belt
Handlebar: Height adjustable
Drive wheels: 13x5.00-6
Speeds: 2 + 1 reverse
Gross weight: 78 Kg

TELLUS 103 B ATTACHMENTS

Ridging plough

32 cm rotavator
with iron wheels Ø350 x 50

CULTIVATORS

Tellus 95 B and Tellus 95 H are multifunctional units, with 4 strokes engine and geared reverse drive. They can be converted from motor cultivator to twin-bladed mower or 50 cm multifunctional mower by simply changing the implement and turning the handlebar.

Multifunctional unit, with 4 strokes engine, geared reverse drive. It can be converted from motor cultivator to twin-bladed mower or 50 cm multifunctional mower by simply changing the implement and turning the handlebar.

TELLUS 95 B TELLUS 95 H

Engine type: B&S 675 series / HONDA GCV 160
Transmission: Worm in oil bath and gears + belts drive
Handlebar: Adjustable & Reversible
Drive wheels: 13x5.00-6
Speeds: 1 + 1 reverse
Gross weight: 55 Kg

TELLUS 95 ATTACHMENTS

Grassland mower 53 cm

Double blade 87 cm cutting bar

Snow blade 85 cm

Rear mount rotavator 50 cm

Ridging plough

Front adjustable brush
82 cm with collector

TELLUS 75/82 models are ready to handle the toughest jobs and larger areas. These rugged cultivators have plenty of horsepower and a well-balanced, easy-to-control design. Fitted with Honda, B&S and Castelgarden engines they create less vibration and bring faster soil

tilling. Two tilling speeds, reverse and forward for transport, get the work done quickly. So if you're breaking up turf, preparing particularly difficult soil or turning over a large vegetable garden at the end of the season, the TELLUS are ready and willing, and more than capable.

TELLUS 82 RHX

Working width: 82 cm
Rotors: 6
Engine: Honda GX 160
Speed: 2+1 speed
Gear: mechanical box
Handle adjustable in height/side
Transport wheels in front
Crop protector discs standard

The TELLUS 82 model with horizontal shaft engine is equipped with belt and chain transmission in oil bath and a gear box for dual speed.

TELLUS 75 RG TELLUS 75 RB TELLUS 75 RH TELLUS 75 RHX

Working width: 75 cm
Rotors: 6
Engine: Castelgarden engine TM 60 / B&S 800 series / Honda GC 160 / Honda GX 160
Speed: 1+1 speed
Handle adjustable in height
Transport wheel in front
Crop protector discs standard

The TELLUS 75 models with horizontal shaft engines are equipped with belt and chain transmission in oil bath.

CULTIVATORS

TELLUS 40 and TELLUS 50 are forward-rotating cultivators ideal for many types of garden work - including preparing seedbeds in spring and maintenance throughout the season. They run more smoothly, more cleanly and more quietly than comparable tillers. They feature a 40 to 50 cm tilling width, heavy duty handles and fingertip controls. Their size makes them perfect for working in raised beds and narrow rows so that your soil stays in top condition all year round. TELLUS is built to last so that you can enjoy more quality time in your garden for years to come. The TELLUS 500 and TELLUS 360 G rotary cultivators are the perfect fit for smaller gardens, and offer you Castelgarden quality at a lower price. This handy 2-in-1 machine will cultivate your garden and bring a crisp edge to beds with the different attachments. They are light and easy to operate, and the Castelgarden engine won't shy away from heavy work.

TELLUS 50 G TELLUS 50 H TELLUS 50 RB

Working width: 50 cm
Rotors: 4
Engine: Castelgarden engine OM 55 / Honda GCV 135 / B&S 625-series
Speed: Single speed / 1+1 speed
Handle adjustable in height/side
Transport wheels at rear
Crop protector discs standard

TELLUS 40/50 models with vertical shaft engine are equipped with belt and worm gear transmission in oil bath, a proven reliable design.

TELLUS 40 G TELLUS 40 RG

Working width: 40 cm
Rotors: 4
Engine: Castelgarden engine SV40 / OM 55
Speed: Single speed / 1+1 speed
Handle adjustable in height
Transport wheels at rear

TELLUS 500 G TELLUS 500 RG

Working width: 50 cm
Rotors: 4
Engine: Castelgarden engine M50 / OM55
Speed: Single speed / 1+1 speed
Worm gear and belt drive
Handle adjustable in height/side
Transport wheel in front
Crop protector discs as standard

TELLUS 360 G

Working width: 36 cm
Rotors: 4
Engine: Castelgarden engine V 35
Speed: Single speed
Worm gear and belt drive
Handle adjustable in height
Transport wheel in front

PETROL SCYTHER

Tried and tested technology, outstanding cutting performance and exemplary reliability are the inherent qualities in the new Castलगarden Tellus 87 B scythe mower. This self-propelled sickle bar mower will cut long grass, tall weeds and light scrub in paddocks, orchards and meadows. It is designed to operate in conditions where you can't

use an ordinary mower. Equipped with a powerful Briggs & Stratton 625 series engine, the Tellus 87 B has a single mulch bar with height adjustment skids and cutter bar clutch. 87 cm cutting width and clutched v-belt drive system. The wheels have solid track grip tyres for inclines and rough terrain. Weight 54 kg.

TELLUS 87 B

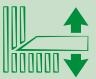

Engine: Briggs & Stratton 625 series
Transmission: endless screw in oil bath and belts
Speed: single
Recoil starter
Drive wheels: 4.00-6 semi-pneumatic
Cutting bar: 87 cm with easy connection system
Gross weight: 54 kg

Lever on handlebars disengages wheels and mowing bar.
